

# General Test

2018 August 30

# Contents

- 1 SomeChapter** **3**
- 1.1 SomeSection . . . . . 3

# Chapter 1

## SomeChapter

This is dummy text

Example

```
gap> S5 := SymmetricGroup(5);
Sym( [ 1 .. 5 ] )
gap> Size(S5);
120
```

And we wrap up with some dummy text

### 1.1 SomeSection

Some test just inside a section. We can use test some markdown features here:

- This is a list item.
  - This is a subitem
  - We can also use math mode here:  $a^2 + b^2 = c^2$ .
- This is *emphasized* text in a list item.
- This is also *emphasized* text in a list item.
- This is inline code in a list item.

All of this can *also* be *used* outside of a list.

#### 1.1.1 InfoTESTCLASS

▷ InfoTESTCLASS

(info class)

An info class
